## Biggest Loser Cleo the Cat

Cleo came in to Healing Paws for her annual wellness check-up. The veterinarian she saw was concerned about her weight gain since her last visit. She was clearly obese and her parents knew something needed to be done.

After her initial exam and weight assessment, she was put on a personalized weight loss program complete with a personalized diet.

Within 6 months, Cleo lost 5.5 pounds. That is a lot of weight for a domestic cat! Her parents have been very diligent in making sure Cleo sticks to the program, and will keep it up until she is at her ideal weight.

This is a true success story. We want Cleo to live a healthy and happy life and because of this weight loss, she will have a lower risk of developing diabetes, arthritis and heart disease. Go Cleo!
